Superior Concrete Products is a Pioneering Leader in Building . . .

Superbly Designed and Crafted Precast Concrete Tiny Houses

Superior Concrete Tiny Houses announces . . .

The Big Spur

a Micro-Sized Tiny Home

Made of Solid, Reinforced Precast Concrete!

The essence of tiny house living is captured within ***The Big Spur***, a micro-cabin named in honor of Spur, Texas, the first city in the U.S. to embrace the tiny home movement. Designed for singles or couples who embrace the tiny home lifestyle, The Big Spur measures 10' x 15', giving the unit a foot-print of 150-square-feet. Together with the 60-square-foot queen-sized sleeping loft, the Big Spur provides a spacious 210-square-feet of actual living space. This home can be built on an engineered concrete foundation or constructed on a steel frame axled trailer for ease of relocation. And, for people on the go, The Big Spur can be made into a towable unit. Constructed of beautiful, but rugged reinforced precast concrete and structural steel panels, The Big Spur can be made with one exterior finish, or combined with other finishes for an eye-catching custom appearance. This model combines Superior Wood™ exterior walls with Superior Cobblestone™ as an architectural trim. Each Big Spur Cabin can be customized according to taste and budget.

“Some people like to live large by living in a small, ultra-efficient space allowing them to focus on the issues that matter to them the most, without the worry and expense of a big house.”

- Todd Sternfeld

Superior Concrete Tiny Houses – Custom Precast Homes and Buildings

The Big Spur can be built on a permanent foundation, a steel-frame with axle for ease of relocation or even made towable.

The Big Spur

Inspired by Spur, Texas, the nation's first tiny house-friendly town, The Big Spur has a footprint of 150-square-feet, yet this micro cabin delivers 210-square-feet of living space with the queen-sized sleeping loft. This tiny house provides all the comforts of a larger home in an efficient, compact footprint. The Big Spur features:

- One-bedroom sleeping loft
- Accommodates 2 to 3
- Customizable appliances, countertops and cabinetry
- On and off-grid wiring and plumbing options available
- Interior finish can include paneling or sheetrock
- Wood laminate flooring, tile or carpet or other options available
- Rugged steel-reinforced precast concrete panels combine Superior Wood™ with Superior Cobblestone™ to give the exterior a personalized architectural finish
- Energy-efficient (windows / added insulation)
- JELD-WEN Steel Door – energy efficient wood edge with built-in blinds
- DECRA® Steel Villa Tile Metal Shingles
- Foundation options: engineered concrete, steel-frame with axle for ease of relocation or towable

The Great Room / Kitchen

- Abundant built-in storage with finish of choice
- Cedar-lined closet
- Ceiling fan
- Countertops available in laminate, granite, quartz, tile or other options
- Full-size appliances in finish of choice – including an optional Dometic washer / dryer unit

Bathroom

- Full-sized 30" x 30" shower
- Ceramic tile flooring
- Decorative wall tiles
- Conventional or Nature's Head Composting Toilet
- Custom vanity and medicine cabinet

Sleeping Loft

- Queen-sized sleeping loft provides 60-square feet of living space
- Abundant built-in storage
- Added electrical outlets for televisions and electronics
- Built-in light-fixtures
- Energy-efficient picture window with wood blinds

***All Superior Concrete Tiny Houses are customizable from start to finish!
If you can envision it, we can build the tiny home of your dreams!***

About Superior Concrete Products and Superior Concrete Tiny Houses:

For more than thirty years, Superior Concrete Products has been engineering, manufacturing and installing modular precast concrete walls, fences, structures and other barrier systems, and now the company is debuting its newest product line -- Superior Concrete Tiny Houses. Superbly designed and crafted tiny homes and cabins, these dwellings offer a smart custom look that stands out wherever it goes – whether it be a lake lot, a hunting lodge, a granny pod or a micro unit hauled behind a truck. Superior Concrete Tiny Homes are built to last. Constructed and engineered from modular precast concrete available in a variety of wood, stucco, brick or stone finishes, home components can be shipped anywhere in the world. Certified by the National Precast Concrete Association, the company is headquartered in Euless, Texas, and the state-of-the art manufacturing facility is in Cleburne, Texas.
