SUPERIOR

CONCRETE TINY HOUSES

WOOD | BRICK | STONE

Superior Concrete Products is a Pioneering Leader in Building . . .

Superbly Designed and Crafted Precast Concrete Tiny Houses

Superior Concrete Tiny Houses proudly announces . . .

The California Shed

*a Small Modular Building, Suitable for a Tiny Home,
Office, Storage or More
Made of Reinforced Precast Concrete!*

Not necessarily a tiny house, but it could be . . . **The California Shed** is a modular building designed for a variety of uses. Measuring 10' x 15', The California Shed has a footprint of 150-square-feet, and with the addition of a loft, that footage can increase remarkably. The beauty of the shed lies in the building's versatility. The Shed can be built on an engineered concrete foundation or constructed on an axled steel frame for ease of relocation. And, for people that move frequently, The Shed can be made as a towable unit. Like the company's other modular structures, The Shed is constructed of rugged reinforced precast concrete and structural steel panels. This model combines Superior Wood™ exterior walls with Superior Cobblestone™ as an architectural trim. The Shed can be converted into a tiny home, office, retail store or storage building, and as with all Superior Concrete Tiny Houses, this unit can be customized as needed according to taste and budget.

“When it comes to purchasing a home or building, people want a structure that lasts longer than a few years. Given their long useful life, ideally, these structures can be altered over time making them useful for a variety of different functions.”

- Todd Sternfeld

Superior Concrete Tiny Houses – Custom Precast Homes and Buildings

The California Shed can be built on a permanent foundation, an axled steel-frame for ease of relocation or even made towable.

The California Shed

An efficient and roomy 150-square-foot building. Superior Concrete Tiny Houses has created a versatile structure that can be used as a micro-tiny house, retail shop, office or storage shed. The California Shed features:

- Accommodates 2 to 3
- Optional storage room or loft
- Customizable cabinetry, walls, flooring and more
- On and off-grid wiring and plumbing options available
- Rugged steel-reinforced precast concrete panels combine Superior Wood™ with Superior Cobblestone™ to give the exterior a personalized architectural finish
- Energy-efficient (windows / added insulation)
- DECRA® Steel Villa Tile Metal Shingles
- Foundation options: engineered concrete, steel-frame with axle for ease of relocation or towable

About Superior Concrete Products and Superior Concrete Tiny Houses:

For more than thirty years, Superior Concrete Products has been engineering, manufacturing and installing modular precast concrete walls, fences, structures and other barrier systems, and now the company is debuting its newest product line -- Superior Concrete Tiny Houses. Superbly designed and crafted tiny homes and cabins, these dwellings offer a smart custom look that stands out wherever it goes – whether it be a lake lot, a hunting lodge, a granny pod or a micro unit hauled behind a truck. Superior Concrete Tiny Homes are built to last. Constructed and engineered from modular precast concrete available in a variety of wood, stucco, brick or stone finishes, home components can be shipped anywhere in the world. Certified by the National Precast Concrete Association, the company is headquartered in Euless, Texas, and the state-of-the art manufacturing facility is in Cleburne, Texas.
