Superior Concrete Products is a Pioneering Leader in Building . . .

Superbly Designed and Crafted Precast Concrete Tiny Houses

Superior Concrete Tiny Houses proudly announces . . .

The Chisholm Trail Cabin

*the Perfect Tiny Home Weekend Retreat
Made of Reinforced Precast Concrete!*

The perfect size for a weekend getaway, the Superior Concrete Tiny Houses' **Chisholm Trail Cabin** is a spacious, but compact two-bedroom home designed to accommodate up to six people -- ideal for couples or small families. Measuring 15' x 25', The Chisholm Trail gives homeowners 375-square-feet of living space. Created for those with a carefree life-style, this home has laminate countertops, wood laminate floors and full-size appliances. The bathroom has a ceramic tile floor and is equipped with a large shower. For additional living space, this model also includes an optional 120-square-foot outdoor precast concrete porch. Constructed on a rugged steel frame trailer with wheels, this cabin can be moved onto your land, or built on an engineered concrete foundation. Fully-customizable according to taste and budget, the Chisholm Trail Cabin's maintenance-free steel-reinforced precast concrete structure is made of Superior Wood™ to duplicate the warm natural finish of timber siding.

"For those that enjoy having a weekend retreat, without the hassles of periodic painting and maintenance, living in a tiny home gives people with a busy life-style more free time for hobbies and other activities with friends and family."

If you can envision it, we can build the tiny home of your dreams!***

About Superior Concrete Products and Superior Concrete Tiny Houses:

For more than thirty years, Superior Concrete Products has been engineering, manufacturing and installing modular precast concrete walls, fences, structures and other barrier systems, and now the company is debuting its newest product line -- Superior Concrete Tiny Houses. Superbly designed and crafted tiny homes and cabins, these dwellings offer a smart custom look that stands out wherever it goes – whether it be a lake lot, a hunting lodge, a granny pod or a micro unit hauled behind a truck. Superior Concrete Tiny Homes are built to last. Constructed and engineered from modular precast concrete available in a variety of wood, stucco, brick or stone finishes, home components can be shipped anywhere in the world. Certified by the National Precast Concrete Association, the company is headquartered in Euless, Texas, and the state-of-the art manufacturing facility is in Cleburne, Texas.
